PROFESSIONAL SUMMARY

Computer Science graduate with practical exposure to software development, data collection, data cleaning, Excel-based reporting, and market research. Internship experience working with React.js, FastAPI, PostgreSQL, Flutter, and Streamlit, along with Java programming experience. Familiar with Python fundamentals, web technologies, database concepts, and data analysis workflows. Seeking opportunities in Python Development, Data Analysis, and Software Development.

TECHNICAL SKILLS

Programming: Python (Basic), Java, C

Data Analysis: Data collection, data cleaning, data validation, data organization, exploratory data analysis (EDA), basic data visualization, market research, Excel-based reporting

Software & Web Development: HTML, CSS, JavaScript, React.js, Tailwind CSS, Node.js, Express.js, FastAPI, Streamlit

Databases: PostgreSQL, MongoDB

Tools: Microsoft Excel, Power BI (Basic), Git, GitHub

Other: Technical documentation, reporting, problem-solving, data quality checks

PROFESSIONAL EXPERIENCE

Operations & Data Analytics Associate / Vidushi Fellow

Drishtee Foundation | Jul 2026 – Present

- Collect, validate, clean, categorize, and consolidate field data gathered through surveys, interviews, and market visits.
- Conduct village and local-market mapping, documenting retailers, wholesalers, product categories, prices, raw materials, and business opportunities.
- Use Microsoft Excel to maintain structured datasets, track milestones, review baseline information, and prepare operational reports.
- Analyze information on rural enterprises, community groups, products, and income-generating activities to support operational decisions and potential DDU opportunities.
- Prepare reports and presentations summarizing field findings, cost-related information, business observations, and progress against assigned milestones.
- Compare product costs, raw-material requirements, and local-market pricing to support product and business assessments.
- Collaborate with field teams and stakeholders to identify operational gaps and improve the quality and usability of field data.

Software Developer Trainee Intern

IDEAS Technology Innovation Hub, Indian Statistical Institute, Kolkata | Jan 2026 – Mar 2026

- Contributed to the Tripura Consumer Price Index (CPI) project, supporting a mobile application developed with Flutter and an admin portal built with React.js.
- Developed backend functionality using FastAPI and worked with PostgreSQL for database management and data storage.
- Managed and organized market-survey data through browser-based forms, supporting data accuracy and consistency.
- Created and updated Excel-based reports from customer-provided datasets for analysis and reporting.
- Built a Streamlit-based testing portal and contributed to basic mobile application modules.
- Supported data-processing workflows through structured data handling and process improvements.
- Prepared user manuals and technical documentation for backend systems and mobile-application workflows.

Java Intern

Oasis Infobyte | Aug 2024 – Sep 2024

- Developed Java-based applications with a focus on core programming and object-oriented programming concepts.
- Practiced debugging, logic building, and code optimization through hands-on project work.
- Worked on application improvements while following clean-code practices.

PROJECTS

College ERP System | MERN Stack

- Developed a full-stack ERP system with authentication and role-based dashboards.
- Implemented backend APIs and integrated the frontend with the database to support application data flow.
- Technologies: React.js, Node.js, Express.js, MongoDB, JWT.

EDUCATION

B.Tech, Computer Science & Engineering — Aliah University | 2025 | CGPA: 7.12

Class XII (WBCHSE) — TAV | 2021 | 68%

Class X (WBBSE) — SKV | 2019 | 53%

ACHIEVEMENTS

- Desktop Publishing Course (WBSCVT) – 82.4%.
- First position in a district-level drawing competition.
